

Call for candidates

Professor in Bioprocess Development

N° 07007

Posting period: May 14 to June 23, 2024

JOB DESCRIPTION: Professor

LOCATION: Main Campus

STATUS: Regular

ADMINISTRATIVE UNIT:

Faculty of Engineering

Chemical and Biotechnology Engineering Department

SCHEDULE: Full time tenure-track position

The [Université de Sherbrooke](#) (UdeS) is seeking applications for a position as professor in Bioprocess development. This is a full-time tenure track position in the Chemical and Biotechnology Engineering Department of the Faculty of Engineering.

About the Faculty of Engineering

The UdeS [Faculty of Engineering](#) is a leader in education and applied research. Recognized for its dynamism in collaborative research, it stands out particularly in terms of technology transfer and concrete impacts on society.

It is also a faculty on a human scale, which favours rigorous and complete training of its students, particularly through the alternating [study and internship program](#). In a friendly and highly collaborative environment, discovery and innovation are strongly encouraged.

To foster its long-term growth, the Faculty of Engineering is particularly focused on interdisciplinary initiatives and emerging fields. The Faculty of Engineering has several research centers as well as the [Interdisciplinary Institute for Technological Innovation](#) (3IT), a part of the Integrated Innovation Chain along with the [Institut quantique](#) (IQ) and the [Centre de collaboration MiQro Innovation](#) (C2MI).

[Discover all the advantages of a career at the UdeS Faculty of Engineering, in the heart of the Eastern Townships!](#)

About the Department

The faculty members of the [Chemical and Biotechnological Engineering Department](#) are active in the areas of materials, environment and sustainability, renewable energy, green processes, biological and biotechnological processes, pharmaceutical processes and thermal plasmas. The Department has five research chairs and offers master's and doctoral programs that allow students to work in state-of-the-art laboratories under the supervision of internationally recognized researchers. The Department is distinguished by its facilities, which include biotechnology process laboratories, including a Level II laboratory, a pharmaceutical process, a process scale-up center, environmental laboratories, characterization laboratories, nanotechnology laboratories and chemical metallurgical process laboratories.

Expertise

The candidate will teach in the various programs of the Department and demonstrate excellent research skills in the area of bioprocess engineering. The candidate will conduct fundamental and applied research activities in any of the following areas:

- **Bioprocessing and Biomanufacturing** - unit operations involving the development and industrial scale-up of cell cultures, environmental bioprocesses, mRNA-based processes, processes for cell therapy, regulation and monitoring of bioprocesses using bioanalytical tools/PAT approach.
- **Separation/purification** - downstream processing of bioproducts (e.g. extraction, separation, purification, identification and formulation).
- **Sustainability** - decarbonation, renewable energy including clean fuels and biomethanization technologies, energy efficiency, waste recovery, life cycle analysis and technology risk assessment.
- **Environment and climate crisis** - air, water and soil biotreatment;
- **Any field** that will be of interest to the bioprocess development of our department.

Functions

- Teach at the undergraduate and graduate levels.
- Develop fundamental or applied research activities.
- Supervise graduate and doctoral students.
- Participate in university life.
- Contribute to community service.

Requirements

- Hold a doctorate in a relevant discipline
- Have an interest in and aptitude for teaching, university pedagogy and skills development.
- Have an interest in research (disciplinary, interdisciplinary), innovation and knowledge transfer.
- Be able to plan, organize and develop a project independently.
- Demonstrate an ability to supervise graduate students.
- Have previously published in peer-reviewed journals.
- Demonstrate the ability to establish and maintain good interpersonal relationships, collaboration and teamwork skills.
- Demonstrate leadership qualities, initiative and excellent ability to communicate and interact effectively and smoothly with various internal and external partners.
- Ability to comply with the requirements of [responsible research conduct](#).
- Have the ability to **teach in French** or to achieve this ability within a reasonable time frame.
- Be a member of the *Ordre des ingénieurs du Québec* (OIQ) or have the qualifications to become a member and commit to becoming a member within 5 years.

The working conditions are governed by the collective agreements in force.

Regular, full-time, tenure-track position

Anticipated start date: September 1, 2024

Equity, diversity and inclusion

The Université de Sherbrooke (UdeS) values equity, diversity, equality and inclusion in employment within its community and invites all qualified individuals to apply, particularly women, members of visible and ethnic minorities, Aboriginal peoples and [persons with disabilities](#) in compliance with the Quebec Act respecting equal access to employment in public bodies. The screening and assessment tools can be adapted according to the needs of persons with disabilities who request them, and this, in complete confidentiality. The Université de Sherbrooke also encourages people of all sexual orientations and gender identities to apply. Priority will be given to Canadians and permanent residents. [Learn more about equity, diversity and inclusion at UdeS](#).

Application process

The deadline for submitting applications is **June 23, 2024**.

Review of applications will begin on June 24, 2024 and will continue until the position is filled.

We invite you to submit your application electronically by clicking on the "[Postuler](#)" button.

Please combine the following in one pdf document: (please provide complete files)

1. Your curriculum vitae;
2. A letter of motivation;
3. A proposal for a research chair program (2 pages) describing the problem, objectives, methodological approach, links with your previous work, as well as the training of highly qualified personnel (students, research staff, etc.). The adequacy with the strategic plan of the Université de Sherbrooke and the Faculty of Engineering should also be explained. Funding opportunities (granting agency programs, companies, etc.), as well as the collaborations and networking envisaged should be described;
4. A description of your vision of teaching (2 pages) including the [courses](#) to which you could contribute and/or that you would like to develop and the teaching methods that you advocate;
5. A one-page text on equity-diversity-inclusion (EDI) that presents specific actions already taken or planned to promote EDI (i) in the training of new staff (recruitment, mentoring, career development); (ii) in the realization of research projects; and (iii) in the involvement in university life. We invite you to consult the [guide to submitting an EDI text](#) (in French). The Faculty is interested in individuals whose research, teaching, and community involvement demonstrate the importance it places on diversity in higher education;
6. Reprints from the most relevant recent contributions (maximum 3).

In addition, please have **three external referees** each send a letter of recommendation directly to the contact information below:
