Stage postdoctoral

LOCATION(S)

Campus de Longueuil

Project Description

----Canadian population survey ----

Students will characterize changes in healthy lifestyle habits (e.g. physical activity, sedentary lifestyle, healthy eating habits, and alcohol consumption) and their impact on anxiety and depression in the pre- and post-pandemic periods, and the associated factors, using Canadian data.

Profiles sought

- Health sciences, public health or other relevant field.
- Experience in quantitative analysis

Discipline(s) by sector

Sciences de la santé

Épidémiologie et biostatistique
