### RESEARCH CO-DIRECTION

Alexandre Cabral, Professeur - Department  
of Civil and Building Engineering

### INFORMATION

[alexandre.cabral@usherbrooke.ca](mailto:alexandre.cabral@usherbrooke.ca)

### ADMINISTRATIVE UNIT(S)

Faculté de génie  
Département de génie civil et de génie du  
bâtiment

### LEVEL(S)

2e cycle  
3e cycle

### LOCATION(S)

Campus de Sherbrooke

---

## Project Description

We are seeking students (MAsc or PhD) for a field and laboratory study of methane oxidation systems in landfills. It is proposed to design and construct novel methane oxidation systems for the reduction of residual methane emissions caused from degradation of waste in landfills. The project will include the design, material analysis, installation, monitoring, and the data collection and analysis of engineered biosystems for methane reduction. We are seeking applicants who are passionate about developing sustainable solutions for complex problems.

### Requirements:

Excellent academic record

Background in civil or environmental engineering, geology, or a related field with background in soil science.

Basic French language competence

Located in Canada, in the Province of Quebec, the Université de Sherbrooke is a French-speaking institution that offers you the opportunity to benefit from an academic education that is recognized and valued around the world. The Université de Sherbrooke is host to more than 31 700 students from more than 80 countries (Source UdeS).

Interested candidates should send their CVs, academic transcripts, and an exemple of technical writing (e.g., journal/conference article) to Pre. Vanessa Di Battista with the subject line "Biowindows". Only selected candidates will be contacted.

This project can accommodate one or more students in the following programs:

- Doctoral thesis
- Research Master's thesis
- 3rd cycle research internship
- 2nd cycle research internship

**Discipline(s) by sector**

Sciences naturelles et génie

Génie civil

**Funding offered**

To be discussed

**Partner(s)**

Dillon Consulting , Environnement Canada , Valoris, Région municipale de Waterloo
