

This program delivers comprehensive training in the fundamental principles and concepts of our legal system. With a specific focus on practical experience, it guides students in the development of a professional mindset and skills needed for success in the legal world: the capacity for analysis and synthesis, writing skills, critical thinking and rigor.

By the end of their third study term, just as they prepare for their first work term, students will have completed 75% of all compulsory courses in the program. No doubt, they will prove to be an added value for your firm, company, ministry and organization. This contingent program admits only 35 of carefully selected applicants each year, who must have an exemplary academic background to be considered for admission.
