

The Bachelor of Accounting program is designed specifically to groom expert accountants with the skills and proficiency in such in-demand areas as financial reporting that meets the particular requirements of investors, and rigorous auditing. In order to prepare its students for the challenges of the present-day business context and management practices, this program integrates its foundational courses in accounting with general administrative studies.

Such dual curriculum allows students to gain skills in workflow organization, entrepreneurship and decision-making. Upon successful completion of the program, students may be eligible to obtain a professional designation from the Ordre des comptables professionnels agréés du Québec by pursuing their graduate studies, passing the evaluation examinations and acquiring the required practical work experience.

WHAT OUR STUDENTS CAN DO FOR YOU
